

# General

## Aerodrome Description

With just under 8 million passengers passing through the airport in 2014, it was the busiest airport in Morocco and the fourth busiest in Africa. In August 2014, ONDA reported a year-on-year increase of 7.28% passenger traffic, to 918,238. The airport serves as hub for Royal Air Maroc, Royal Air Maroc Express and Air Arabia Maroc. It is named after King Mohammed V of Morocco, who led the country's successful push for independence from French and Spanish colonial rule.

Data	Value
ARP	N33°21.85' / W7°34.90'
Elevation	656 feet
Transition altitude	4000 ft

## Scenery

Scenery usage is strongly recommended. Here is the selection of scenery that we suggest you use when flying into or out of Casablanca!

Recommended Sceneries
<div><b>Microsoft Flight Simulator</b></div> <div><a href="#">Paid: PrealSoft</a></div>
<div><b>Prepar3D</b></div> <div><a href="#">Paid: PrealSoft (P3D v5)</a><a href="#">Paid: PrealSoft (P3D v4)</a><a href="#">Paid: FSDG (FSX/P3D)</a><a href="#">Free: JMS Designs (FSX/P3D)</a></div>

## X-Plane

# Charts

It is important to have the latest version of the charts when flying. Through the Morocco eAIP, you can get a set of charts for Mohammed V airport.

As part of your planning and preparation for your flight, we encourage you to review these charts. They are directly accessible [here](#).

# AIRAC

To prevent problems with inaccurate data, please make sure you have the most recent AIRAC cycle installed before your next flight.
